

Ensure top roofing performance.
Use a Top of the House® Certified Contractor.

It's about more than just shingles.

The performance of your new roof goes a lot deeper than the new shingles. It takes a complete system—including ventilation and insulation products—to maximize performance. These elements work together to provide you comfort, help you save money, reduce greenhouse gas emissions and extend the life of your roof. So to get the right Top of the House® system for your home, look to a *Top of the House Certified Contractor*.

Ventilation + insulation = fewer roof problems.

Trapped heat and moisture in the attic can severely jeopardize the performance of a roof. The combination of insulation and a ventilation system helps to keep excessive household moisture and heat out. As a result, the proper conditions and temperature are better maintained in the attic and on the roof deck throughout the year.

Attic moisture can cause:

- Wet wood—sagging roof deck
- Potential insect infestation
- Mold, spores, fungi and mildew
- Metal rust (nail heads)
- Interior damage

Attic heat can cause:

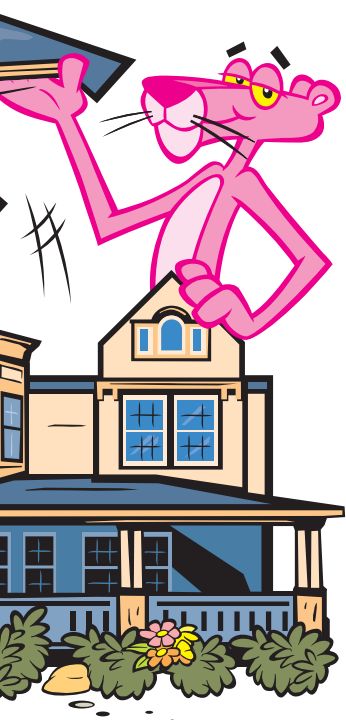

- Ice dams that prevent water runoff
- Premature failure of roofing materials

Have an expert inspect your Top of the House.®

Save energy... and save money.

Did you know up to 40% of a home's conditioned air escapes through the attic? If your heating and cooling energy costs are going through the roof, there's an easy solution: Adding attic insulation and sealing air leaks can help cut heating and cooling energy bills by up to 20%.*

Adding attic insulation: The most effective thing you can do to reduce greenhouse gas emissions.

Do it for your roof... for your budget... and for your planet. Adding Owens Corning™ PINK FIBERGLAS™ Blown-In Insulation to your attic can reduce greenhouse gas emissions by over half a ton each year.** PINK is truly green.

All this from the brand you know and trust.

Owens Corning has been a recognized leader in the building materials industry for over 65 years and has a long history of advancing the building sciences. Each and every day, our people redefine what is possible, delivering high-quality products and services to homes around the globe.

We're making our world a more energy-efficient... more beautiful... and more comfortable place for you to be.

You've probably already met the Owens Corning mascot, The Pink Panther.™ Our building products and famous PINK Insulation have been used in millions of homes.
